67								
68	Nomenclature for "sewer inspec access" spreadsheet.							
69								
70	There are 2 groups of sewer accesses, one is under a grate in the driveway of most 2							
71	story units, the other is in the dirt either besides the driveway of the 2 story units or in the							
72	dirt near the junction of the wall between a one story unit and the neighboring 2 story							
73	unit.							
74								
75	* UNIT = street number of the Unit in the complex							
76								
77	* 1 = The pound sign (#) in this column indicates unit is a one story unit							
78								
79	* STATUS = Three entries appear;							
80	1. <i>unknown</i> - location not know at this time,							
81	2. Driveway - the inspection access in in the driveway and visible . no further entry is							
82	needed,							
83	3. mapped - the location of the inspection access cover is specified in inches from							
84	two points for one story units or for 2 story units from the wall when access is in dirt							
85	beside driveway							
86								
87	* START POINT = a description of where the inspection access was found, or for the							
88	driveway located inspection access grateings are they on the left or right side of the							
89	driveway (as viewed from the street)							
90								
91	*FROM; THE WALL = measured from the concrete wall of the unit toward the street							
92								
93	* FROM; THE CORNER = 1 story units measured from the point where the concrete of 1							
94	and 2 story units meet (it is usually under the window nearest the corner), 2 story units							
95	- <i>left or right of driveway</i> (usually right beside the driveway)							
96								
97
